

Press Release

European Drives & Motor Repairs Ltd (EDMR) will be exhibiting at the **Manufacturing Technology Ireland Exhibition** from the 7-8 of November 2007, located at the National Show centre near Dublin Airport.

EDMR is one of Europe's leading independent repairers and suppliers of AC & DC variable speed motors and associated drives. From their base in Northampton, England they service and supply products to over 50 countries worldwide.

At the exhibition they will be showcasing their specialist repair facilities specifically AC & DC servo motor repairs, high speed spindle motor repairs and DC shunt motor repairs. "We currently see these types of repairs from all over Europe and it is our aim to provide a high quality, cost effective and easy to use service", says Simon Bitchenor, sales & marketing manager for EDMR.

To compliment their repair services they will also be exhibiting a selection of products from their sales division, including a variety of servo motors, large DC motors and associated drives. Products on show will be from a number of manufacturers including Danaher Motion, Siemens, Toshiba, Vascat and Oemer.

EDMR has extensive experience in repairing & replacing motors & drives in machine tool, extrusion, plastics, packaging, robotics, printing and metal fabrication industries.

EDMR looks forward to meeting anyone at the exhibition involved with the maintenance and specifying of specialist electric motors and drives.
