# MOTOR & DRIVE REPAIRS

"Up to 60% saving on new"

**Baumuller, BBC, Contraves, Control Techniques, CSR, Dietz, Eurotherm, Indramat, IRT, Kollmorgen, KTK, Lenze, Leroy Somer, Norwin, Num, Pacific Scientific, Parvex, Powertec and Siemens**

- ▶ All types of Thyristor & PWM Drives
- ▶ Authorised service agents for leading manufacturers.
- ▶ Experienced nationwide field service team available to diagnose motor & drive faults on-site
- ▶ 24-7 Operation. ISO 9001:2000
- ▶ Drives are load tested to manufacturers specifications.
- ▶ Spares available for popular drives. Exchange available (where time is critical).
- ▶ New drives available from stock.

Continued investment in electronic repairs has produced a high quality repair facility tailored to meet the demands of manufacturers and end-users alike. Our drives lab gives us the facilities to repair a variety of electronic drives from transistor and thyristor drives through to the latest digital drives

Major Manufacturers products covered include:

**Baumuller, BBC, Contraves, Control Techniques, CSR, Dietz, Eurotherm, Indramat, IRT, Kollmorgen, KTK, Lenze, Leroy Somer, Norwin, Num, Pacific Scientific, Parvex, Powertec, Servomac and Siemens**

Using the latest pinpoint diagnostic repair centre we are able to repair the majority of industrial electronic products regardless of component configuration. Where possible we carry out a full functional system test.

Our expertise, extensive spares holding and appointment as authorised repair centres for many of the leading manufactures enable us to provide the service our customers demand. In addition to drives we are able to repair other industrial electronic equipment such as:

**Inverters, Process Control, Power Supplies, Monitors, Stepper Controllers, CNC and PLC.**
